

SERIOUSLY.

Build a superbug!

What does a superbug look like?
We need your help to build the best superbug you can!

NHS

Leeds

Clinical Commissioning Group

Why?

Antibiotics are medicines that kill harmful bacteria.

Taking antibiotics when we don't need them could mean that they will stop working in the future. The bacteria could become superbugs!

Help stop the superbugs! Stop bacteria from spreading by always washing your hands properly after you've been to the toilet or before you touch food.

What we need you to do

- Gather materials from home – cereal boxes, plastic bottles, whatever you can find to build the best superbug you can
- Build your superbug, give it a name – but don't let it bite you!
- Make a pledge to promise you'll help fight the superbugs at seriouslyresistant.com/seriously-schools
- Ask your friends and family to pledge too
- Ask an adult to share a photo of your superbug using **#SeriouslyResistant**
